Common Pre-Lab Questions and Their Detailed Answers

1. What are the main external features of a crayfish?

Answer:

The main external features of a crayfish include:

- Carapace: The hard shell covering the cephalothorax, providing protection.

- Antennae and Antennules: Sensory organs used for detecting touch, chemicals, and vibrations.
- Chelipeds (Claws): Large front limbs used for capturing food, defense, and communication.
- Walking Legs: Four pairs used for movement.
- Uropods and Telson: The tail fan that helps in swimming and quick backward movement.

Understanding these features aids in identifying parts during dissection and appreciating their functions.

2. Why is it important to handle crayfish carefully during the lab?

Answer:

Careful handling is crucial to prevent injury to the student and the specimen. Crayfish have sharp claws and delicate internal organs. Proper handling reduces stress and injury to the animal, aligns with ethical standards, and ensures the specimen remains intact for observation. Additionally, following safety protocols minimizes risks of cuts, infections, and contamination.

3. Describe the function of the crayfish's gills.

Answer:

Crayfish gills are feathery structures located beneath the carapace, responsible for gas exchange. They absorb oxygen from water and expel carbon dioxide, enabling the crayfish to breathe underwater. The large surface area of the gills maximizes oxygen intake, essential for cellular respiration and survival.

4. What internal organs can be observed during a crayfish dissection?

Answer:

During dissection, students can observe:

- Heart: A dorsal vessel that pumps blood throughout the body.
- Digestive Glands: Located near the stomach, responsible for digestion and nutrient absorption.
- Stomach: Divided into the cardiac and pyloric stomach, involved in grinding and processing food.
- Gonads: Reproductive organs, which differ in appearance between males and females.
- Nerves and Ventral Nerve Cord: Part of the nervous system coordinating movement and sensory input.
